**Directions (Qs.73 – 77)** Read the passage carefully and answer the questions below from the given options.

A pioneering scheme has been started recently in Southampton on England's south coast to educate motorists who have been convicted of drunken driving. The penalty for drunken driving might be the loss of a driving licence and a heavy fine. But under the new scheme, convicted drivers do not pay the fine. Instead they have to attend eight training sessions—one a week organized by the local authority probation service. Designed to demonstrate the damage alcohol can do, the scheme was devised by senior probation officer John Cook. He said about a quarter of the people who came to him had a drink problem, but had not realized how much they were drinking. One way of getting the message across was to make the drivers pour out their usual ration of alcohol and then measure it. Almost everyone pours out not a single measure but a double at least an example of how easy it is to have more than just one drink and to encourage other people to do the same. The instructors on the course are giving clinical evidence of the effects of alcohol on the body and brain. The sober truth is that drinking badly affects driving skills, although the drinker might like to believe otherwise.

**73. The Southampton scheme requires convicted drivers.**

- a) to pay a heavy fine
- b) to attend eight driving sessions—one a week
- c) to undergo a probation service
- d) to surrender their driving licence

**74. John Cook devised the scheme**

- a) as a demonstration technique for driving
- b) to demonstrate the harmful effects of alcohol
- c) to show that Southampton was concerned about drivers
- d) to prove that alcohol does influence driving.

**75. The problem with a quarter of the people who went to John Cook was that they**

- a) did not want to stop drinking
- b) were unaware of the fact that they could get drunk
- c) would not admit that they had a drinking problem
- d) did not know how much they were drinking

**76. Most drivers start off with at least**

- a) a double measure
- b) a single measure
- c) a little less than a single measure
- d) two doubles

**77. The truth is that alcohol**

- a) does not affect the body but only the brain
- b) affects only the brain

c) affects the body and the brain

d) has no effect on the body or the brain.

**Directions (Qs.78 – 80)**For the rule of law to be well .....78..... and enforced, we need to start at the very beginning — mobilising our local communities. A strong, mobilized, civil society is a necessary condition to hold the State to account. It is not about one seemingly revolutionary protest, even if the well-meaning antagonists of the CAA .....79..... believe so. When violence and lawlessness spill over into the streets and begin to constrain our work-a-day lives, as it has across India; when the police are routinely challenged by those on the wrong side of the .....80.....; when the police force is overworked and overwhelmed by political subterfuge, our society will be on the brink. As a society, we are currently engaged in a negative-sum game. The rule of law cannot, unlike riots, be engineered. It can only be practiced if we understand that liberty has to be balanced with equality; and pluralism entails a measure of negative liberty.
